

HYDRANT FLUSHING

St. Clair Township Residents

Public Works will be undertaking annual flushing all fire hydrants connected to the St. Clair Township water system during the hours of 7:30 AM to 4:30 PM beginning May 2011 and continuing into the fall. During this maintenance procedure you may notice some discolouration using your taps, flushing toilets, doing laundry etc. as some sediment may be drawn into your residence. We recommend that you run the cold water tap for a few minutes or until the discolouration disappears.

If discolouration of the water continues after 10 - 15 minutes of normal use, please notify Public Works @ 519-867-2993.
